"Our user growth has been substantial with fourth quarter MAUs reaching 92.8 million and mobile MAUs increasing to 79.5 million, representing impressive year-over-year growth of 29% and 37%, respectively. During the fourth quarter, we generated a multitude of high-quality content through our robust PUGV ecosystem and OGV outlets, including our first self-produced variety show *Storyman 2* and series of Bilibili-produced domestic animation. We also expanded our presence in e-sports and comics, with new premium e-sports streaming offerings and the launch of Bilibili Comic app, both of which cater to Generation Z's diverse entertainment needs. Additionally, we considerably strengthened our anime, mobile games content and commercialization capabilities by securing relationships with market leaders Tencent and Alibaba during the period. As we move through 2019, we will continue to grow our business by adding best-in-class content to our industry-leading platform, and further increase the bond within our community."

Mr. Sam Fan, Chief Financial Officer of Bilibili said, "Our total net revenues increased 57% year-over-year reaching RMB1.16 billion in the fourth quarter, with advancements in each of our core business divisions. As we execute our commercialization strategy, we are pleased to see a more balanced revenue mix with increased revenue contribution from our advertising and live broadcasting, and value-added services businesses. This shift has led to outstanding growth in the number of average monthly paying users, which nearly quadrupled year-over-year to 4.4 million in the fourth quarter. As our community continues to grow, we see considerable potential for increased monetization in the expanding online entertainment industry."

Use of Non-GAAP Financial Measures

The Company uses non-GAAP measures, such as adjusted net loss, adjusted net loss margin and adjusted net loss per share, basic and diluted, in evaluating its operating results and for financial and operational decision-making purposes. The Company believes that the non-GAAP financial measures help identify underlying trends in its business by excluding the impact of share-based compensation expenses and amortization expense related to intangible assets acquired through business acquisitions, which are non-cash charges. The Company believes that the non-GAAP financial measures provide useful information about the Company's results of operations, enhance the overall understanding of the Company's past performance and future prospects and allow for greater visibility with respect to key metrics used by the Company's management in its financial and operational decision-making.

The non-GAAP financial measures are not defined under U.S. GAAP and are not presented in accordance with U.S. GAAP. The non-GAAP financial measures have limitations as analytical tools, and when assessing the Company's operating performance, cash flows or liquidity, investors should not consider them in isolation, or as a substitute for net loss, cash flows provided by operating activities or other consolidated statements of operations and cash flows data prepared in accordance with U.S. GAAP.

The Company mitigates these limitations by reconciling the non-GAAP financial measures to the most comparable U.S. GAAP performance measures, all of which should be considered when evaluating the Company's performance.

For more information on the non-GAAP financial measures, please see the table captioned "Unaudited Reconciliations of GAAP and Non-GAAP Results" set forth at the end of this press release.
